Through the use of food preparation, your team will benefit from a custom-created culinary experience designed to meet and exceed your team building outcomes. Each team is challenged to create a gourmet food item without the use of recipes or in-depth cooking training, depending only on team members' resourcefulness and life experiences.

Your group is divided into smaller teams, with each team given a different “Culinary Challenge,” and the responsibility for making enough of their food item to feed everyone present. All teams' gourmet creations are then combined to create a sumptuous buffet worthy of a 5-star restaurant.

You'll conceive, create and produce a real product without the aid of a proper kitchen or recipes in a short period of time, then dine on your delicious gourmet creations together – a powerful metaphor to experience with your team and to take back to your work place!

### ***Team Tapas and Team Tasting***

Call it “tapas”, “antipasto”, “hor d'oeuvre” or “appetizers” – experience the latest in culinary trends as your group creates hearty, passed appetizers in a lively party setting. The twist is you create the tasty tidbits as you serve them to each other!

The group is divided into smaller teams, with each team given a different culinary “tapas” challenge. Teams rely on each member's resourcefulness and life experiences, as they are challenged to create without the use of recipes or previous training,

Next, the secrets of wine appreciation are bestowed upon the entire group by one of our trained facilitators. Teams are reformed and challenged to put their newfound knowledge to use during a “team blind wine tasting,” as they taste varieties of Testarossa Vineyard's excellent white and red wines. Teams then have to come to consensus as to the identity of each bottle sampled – may the best nose win!

This event is a great way to stretch the senses and experience the best characteristics of a high functioning team.

***Key Ingredients to Success are: High energy, team collaboration, creativity, resourcefulness, and cooperation***
