

# COVID-19 Prevention Program (CPP) for Testarossa Winery

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

**Date: December 14, 2020**

## Authority and Responsibility

The Human Resources Manager has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

## Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections form** as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

## Employee Participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by participating in required COVID safety trainings upon hire and on-going, self-symptom screenings, reporting deficiencies in the workplace and deficiencies in our policies or implementation of the policies in the workplace.

## Employee Screening

We screen our employees by having employee's self-symptom check prior to coming on property for each shift, including taking their temperature. Thermometers are available for use if needed at the winery.

## Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows:

- The severity of the hazard will be assessed and correction time frames assigned, accordingly.
- Individuals are identified as being responsible for timely correction.
- Follow-up measures are taken to ensure timely correction.

## Control of COVID-19 Hazards

### Physical Distancing

Where possible, we ensure at least six feet of physical distancing at all times in our workplace by:

- Any employees capable of effectively working from home are required to do so whenever possible.
- Reducing the number of persons in an area at one time, including visitors.
- Visual cues such as signs and floor markings to indicate where employees and others should be located or their direction and path of travel.
- Staggered arrival, departure, work, and break times when possible.
- Adjusted work processes or procedures, such as reducing production speed, to allow greater distance between employees.
- Temporarily decreasing restroom occupancy to one person.
- Encouraging clocking in/out via phone to discourage gathering around timeclock.
- Encouraging walking specific routes to stay out of more congested areas.
- Limiting one employee per office space, when possible.
- Meetings will be held virtually when possible.

Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved. The time spent in close proximity when required will also be minimized to the best the employee's ability.

### Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department. Employees can choose from reusable cloth masks, disposable mask or if they have a preferred personal mask we allow them to use it. Reusable masks should be washed daily via sink with soap or in a washing machine.

Guests entering the winery are required to wear face masks in order to enter the facility. Guest Service Representatives at the upper and lower Welcome Center enforce this policy. Employees request face masks from management, as needed.

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- When permitted under county orders: While eating and drinking in the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees wearing respiratory protection in accordance with CCR Title 8 section 5144 or other safety orders.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.

Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons unless the unmasked employee is tested at least twice weekly for COVID-19.

### Engineering Controls

We implement the following measures for situations where we cannot maintain at least six feet between individuals: Adding wall barriers (solid wood or Plexiglas) when appropriate (i.e. Welcome Centers).

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

- Opening windows for increased air circulation when it's not damaging to our product and as weather

and air quality permits.

- Increase filtration efficiency with added HEPA air filter to the highest level compatible with the existing ventilation system.
- The ventilation system will be properly maintained and adjusted as needed by the Facilities Team.

### **Cleaning and Disinfecting**

We implement the following cleaning and disinfection measures for frequently touched surfaces:

- Implementation of Cleaning Checklist, which note low, medium and high touch surfaces and the frequency of cleaning for each level.
- Ensuring adequate supplies and adequate time for it to be done properly.
- New guest reservation system that includes a scheduled 15 minute cleaning period for staff between reservations.
- Informing the employees and authorized employee representatives of the frequency and scope of cleaning and disinfection.
- Cleaning of personal workspaces at the start/end of shift.
- Identified two outside companies that can provide sanitization spraying, if needed.

Should we have a COVID-19 case in our workplace, we will implement the following procedures: If a COVID positive person has been at the winery within 48 hours of testing positive, per Santa Clara County order, we will close down that area of the winery for proper cleaning and sanitization following the CDC guidelines for COVID cleaning. Depending on the size of the area exposed and sanitization products available, we contract with an outside company (Bay Power Wash & Plumbing or Carpet Care and Commercial Service Specialists) for sanitization spraying, if not done in house.

### **Shared tools, equipment and personal protective equipment (PPE)**

PPE must not be shared, e.g., gloves, goggles and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be disinfected between uses by the custodial team and/or by providing cleaning materials to the employee, as it depends on the item. Most personal work spaces and items are to be cleaned by the individual using the item.

### **Hand Sanitizing**

In order to implement effective hand sanitizing procedures, we:

- Ensure handwashing facilities are sufficient and fully stocked.
- Determine the need for additional facilities.
- Encourage and allow time for employee handwashing.
- Provide employees with an effective hand sanitizer, and prohibit hand sanitizers that contain methanol (i.e. methyl alcohol).
- Encourage employees to wash their hands for at least 20 seconds each time, frequently.

### **Personal protective equipment (PPE) used to control employees' exposure to COVID-19**

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained.

## **Investigating and Responding to COVID-19 Cases**

This will be accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

Employees who had potential COVID-19 exposure in our workplace will be:

- Offered COVID-19 testing at no cost during their working hours at Concentra, local Urgent Care or Santa Clara County pop up sites. A vendor will be contracted for on-site testing, if determined necessary.
- The information on benefits described in Training and Instruction, and Exclusion of COVID-19 Cases, below, will be provided to them.

## System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Employees should report COVID-19 symptoms and possible hazards should be reported to Human Resources and the employee's direct supervisor/manager. This is communicated via the COVID in the Workplace training (see PowerPoint presentation for reference).
- Employees can report symptoms and hazards without fear of reprisal, which is outlined in the training and temporary Emergency Sick Leave (Family First Coronavirus Response Act) Policy.
- Employees with medical or other conditions that put them at increased risk of severe COVID-19 illness should see HR to determine what accommodations can be made, if any.
- Where testing is not required, employees can access COVID-19 testing through their primary care doctor, local urgent care or Santa Clara County Testing sites:  
<https://www.sccgov.org/sites/covid19/Pages/covid19-testing.aspx>
- In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test. Testing providers for use may include, but are not limited to: Kyla, Lab Corp and Concentra. If we face a situation that requires we provide testing because of an employee exposure we will do so at no cost to the employee during working hours, including when the testing is in response to CCR Title 8 section 3205.1, Multiple COVID-19 Infections and COVID-19 Outbreaks, as well as section 3205.2, Major COVID-19 Outbreaks.
- Information about COVID-19 hazards will be shared with employees as appropriate via email, letters and/or postings, and as described in the Infection Response Plan.

## Training and Instruction

We will provide effective training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
  - COVID-19 is an infectious disease that can be spread through the air.
  - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
  - An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if

the employee has COVID-19 symptoms.

**Appendix D: COVID-19 Training Roster** will be used to document any training(s) that occurred after December 1, 2020.

## Exclusion of COVID-19 Cases

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings, seniority, and all other employee rights and benefits whenever we've demonstrated that the COVID-19 exposure is work related. This will be accomplished by allowing use of paid sick leave, paid vacation or providing other wage continuation not provided through Workers Compensation (as required), while also maintaining the health insurance benefits offered.
- Providing employees at the time of exclusion with information on available benefits.

## Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

## Return-to-Work Criteria

- COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
  - At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
  - COVID-19 symptoms have improved.
  - At least 10 days have passed since COVID-19 symptoms first appeared.
- COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work.
- If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.

Rob Jensen

Rob Jensen, Owner/Proprietor

## Appendix B: COVID-19 Inspections

[This form is only intended to get you started. Review the information available at [www.dir.ca.gov/dosh/coronavirus/](http://www.dir.ca.gov/dosh/coronavirus/) for additional guidance on what to regularly inspect for, including issues that may be more pertinent to your particular type of workplace. You will need to modify form accordingly.]

Date: [enter date]

Name of person conducting the inspection: [enter names]

Work location evaluated: [enter information]

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
<b>Engineering</b>			
Barriers/partitions			
Ventilation (amount of fresh air and filtration maximized)			
Additional room air filtration			
[add any additional controls your workplace is using]			
[add any additional controls your workplace is using]			
<b>Administrative</b>			
Physical distancing			
Surface cleaning and disinfection (frequently enough and adequate supplies)			
Hand washing facilities (adequate numbers and supplies)			
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions			
[add any additional controls your workplace is using]			
[add any additional controls your workplace is using]			
<b>PPE (not shared, available and being worn)</b>			
Face coverings (cleaned sufficiently often)			
Gloves			
Face shields/goggles			
Respiratory protection			
[add any additional controls your workplace is using]			

## Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees' medical records will also be kept confidential and not disclosed or reported without the employee's express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.

**Date:** [enter date]

**Name of person conducting the investigation:** [enter name(s)]

<b>Employee (or non-employee*) name:</b>		<b>Occupation (if non-employee, why they were in the workplace):</b>	
<b>Location where employee worked (or non-employee was present in the workplace):</b>		<b>Date investigation was initiated:</b>	
<b>Was COVID-19 test offered?</b>		<b>Name(s) of staff involved in the investigation:</b>	
<b>Date and time the COVID-19 case was last present in the workplace:</b>		<b>Date of the positive or negative test and/or diagnosis:</b>	
<b>Date the case first had one or more COVID-19 symptoms:</b>		<b>Information received regarding COVID-19 test results and onset of symptoms (attach documentation):</b>	

**Results of the evaluation of the COVID-19 case and all locations at the workplace that may have been visited by the COVID-19 case during the high-risk exposure period, and who may have been exposed (attach additional information):**

<b>Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:</b>			
<b>All employees who may have had COVID-19 exposure and their authorized representatives.</b>	<b>Date:</b>		
	<b>Names of employees that were notified:</b>		
<b>Independent contractors and other employers present at the workplace during the high-risk exposure period.</b>	<b>Date:</b>		
	<b>Names of individuals that were notified:</b>		
<b>What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?</b>		<b>What could be done to reduce exposure to COVID-19?</b>	
<b>Was local health department notified?</b>		<b>Date:</b>	

\*Should an employer be made aware of a non-employee infection source COVID-19 status.

## Additional Consideration #1

### Multiple COVID-19 Infections and COVID-19 Outbreaks

**[This section will need to be added to your CPP if your workplace is identified by a local health department as the location of a COVID-19 outbreak, or there are three or more COVID-19 cases in your workplace within a 14-day period. Reference section 3205.1 for details.]**

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

#### COVID-19 testing

- We will provide COVID-19 testing to all employees in our exposed workplace except for employees who were not present during the period of an outbreak identified by a local health department or the relevant 14-day period. COVID-19 testing will be provided at no cost to employees during employees' working hours.
- COVID-19 testing consists of the following:
  - All employees in our exposed workplace will be immediately tested and then tested again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine period required by, or orders issued by, the local health department.
  - After the first two COVID-19 tests, we will continue to provide COVID-19 testing of employees who remain at the workplace at least once per week, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
  - We will provide additional testing when deemed necessary by Cal/OSHA.

#### Exclusion of COVID-19 cases

We will ensure COVID-19 cases and employees who had COVID-19 exposure are excluded from the workplace in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria** requirements, and local health officer orders if applicable.

#### Investigation of workplace COVID-19 illness

We will immediately investigate and determine possible workplace-related factors that contributed to the COVID-19 outbreak in accordance with our CPP **Investigating and Responding to COVID-19 Cases**.

#### COVID-19 investigation, review and hazard correction

In addition to our CPP **Identification and Evaluation of COVID-19 Hazards** and **Correction of COVID-19 Hazards**, we will immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review will be documented and include:

- Investigation of new or unabated COVID-19 hazards including:
  - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
  - Our COVID-19 testing policies.
  - Insufficient outdoor air.
  - Insufficient air filtration.
  - Lack of physical distancing.
- Updating the review:
  - Every thirty days that the outbreak continues.
  - In response to new information or to new or previously unrecognized COVID-19 hazards.
  - When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and

review. We will consider:

- Moving indoor tasks outdoors or having them performed remotely.
- Increasing outdoor air supply when work is done indoors.
- Improving air filtration.
- Increasing physical distancing as much as possible.
- Respiratory protection.
- [describe other applicable controls].

#### **Notifications to the local health department**

- Immediately, but no longer than 48 hours after learning of three or more COVID-19 cases in our workplace, we will contact the local health department for guidance on preventing the further spread of COVID-19 within the workplace.
- We will provide to the local health department the total number of COVID-19 cases and for each COVID-19 case, the name, contact information, occupation, workplace location, business address, the hospitalization and/or fatality status, and North American Industry Classification System code of the workplace of the COVID-19 case, and any other information requested by the local health department. We will continue to give notice to the local health department of any subsequent COVID-19 cases at our workplace.

## **Additional Consideration #2**

### **Major COVID-19 Outbreaks**

**[This section will need to be added to your CPP should your workplace experience 20 or more COVID-19 cases within a 30-day period. Reference section 3205.2 for details.]**

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

#### **COVID-19 testing**

We will provide twice a week COVID-19 testing, or more frequently if recommended by the local health department, to all employees present at our exposed workplace during the relevant 30-day period(s) and who remain at the workplace. COVID-19 testing will be provided at no cost to employees during employees' working hours.

#### **Exclusion of COVID-19 cases**

We will ensure COVID-19 cases and employees with COVID-19 exposure are excluded from the workplace in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria**, and any relevant local health department orders.

#### **Investigation of workplace COVID-19 illnesses**

We will comply with the requirements of our CPP **Investigating and Responding to COVID-19 Cases**.

#### **COVID-19 hazard correction**

In addition to the requirements of our CPP **Correction of COVID-19 Hazards**, we will take the following actions:

- In buildings or structures with mechanical ventilation, we will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters if compatible with the ventilation system. If MERV-13 or higher filters are not compatible with the ventilation system, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems would reduce the risk of transmission and implement their use to the degree feasible.
- We will determine the need for a respiratory protection program or changes to an existing respiratory protection program under CCR Title 8 section 5144 to address COVID-19 hazards.
- We will evaluate whether to halt some or all operations at our workplace until COVID-19 hazards have been corrected
- Implement any other control measures deemed necessary by Cal/OSHA.

#### **Notifications to the local health department**

We will comply with the requirements of our **Multiple COVID-19 Infections** and **COVID-19 Outbreaks-Notifications to the Local Health Department**.
